J. R. Statist. Soc. B (1994)
56, *No.* 4, *pp.* 729–731

Author Index: Vol. 56, 1994

Atkinson, A. C. and Kent, J. T. Report of the Editors 1
Bacchetti, P. See under *Segal, M. R.*
Barndorff-Nielsen, O. E. Adjusted versions of profile likelihood and directed likelihood, and extended likelihood 125
Belcher, J., Hampton, J. S. and Tunnicliffe Wilson, G. Parameterization of continuous time autoregressive models for irregularly sampled time series data 141
Billard, Z. and Zhao, Z. Multiple-stage non-homogeneous Markov models for the acquired immune deficiency syndrome epidemic 673
Brown, B. M. Grouping corrections for circular goodness-of-fit tests 275
Catchpole, E. A. and Morgan, B. J. T. Boundary estimation in ring recovery models 385
Chan, K. S. and Tong, H. A note on noisy chaos 301
Chen, J. and Kalbfleisch, J. D. Inverse problems in fractal construction: Hellinger distance method 687
Cheng, C.-L. and Van Ness, J. W. On estimating linear relationships when both variables are subject to errors 167
Clogg, C. C. See under *Rudas, T.*
Constantine, A. G. and Hall, P. Characterizing surface smoothness via estimation of effective fractal dimension 97
Dean, A. M. See under *Lewis, S. M.*
Dey, D. K. See under *Gelfand, A. E.*
DiCiccio, T. J. and Stern, S. E. Frequentist and Bayesian Bartlett correction of test statistics based on adjusted profile likelihoods 397
Diebolt, J. and Robert, C. P. Estimation of finite mixture distributions through Bayesian sampling 363
Draper, N. R. See under *Lewis, S. M.*
Edmondson, R. N. Fractional factorial designs for factors with a prime number of quantitative levels 611
Farebrother, R. W. The Cholesky decomposition of $\mathbf{P} - \mathbf{pp}'$ 727
Fisher, N. I. and Lee, A. J. Time series analysis of circular data 327
Fosam, E. B. and Shanbhag, D. N. Certain characterizations of exponential and geometric distributions 157
Frydman, H. A note on nonparametric estimation of the distribution function from interval-censored and truncated observations 71
Gelfand, A. E. and Dey, D. K. Bayesian model choice: asymptotics and exact calculations 501
Gerami, A. and Lewis, S. M. Completely randomized designs for comparing dual with single treatments 161
Geyer, C. J. On the convergence of Monte Carlo maximum likelihood calculations 261
Ghosh, J. K. and Mukerjee, R. Adjusted *versus* conditional likelihood: power properties and Bartlett-type adjustment 185
Grenander, U. and Miller, M. I. Representations of knowledge in complex systems (with discussion) 549
Hadi, A. S. A modification of a method for the detection of outliers in multivariate samples 393
